

VI Workshop Opening: Environment, Ecology, and Education for Children in Machu Picchu

Inkaterra and ITA- Inkaterra Association develop activities that are oriented to the local children education in order to promote a positive approach to the environment and sustainable practices. It is in our hands to educate children in the basis of a responsible and sustainable use of natural resources, guaranteeing a better quality of life for future generations.

The workshop team is composed by the Inkaterra Explorer Guides, Inkaterra biologists, ITA volunteers, Ministry of Culture and Ministry of Environment educators, as well as local guides volunteers.

The Workshop activities were oriented to the involvement of local children in conservation practices at the Historical Sanctuary of Machu Picchu, generating an influence among their close relatives.
