21 September 1983

Dear Sr. Purisaca:

Enclosed is a list of the bird species found at Cuzco Amazónico by the expedition of the Museum of Vertebrate Zoology to Madre de Dios in May and June 1983. This list has been combined with the species list from my trip to the site in November and December 1982. You can see that there are many differences between the two collections made at different seasons of the year. Even though a very limited amount of field work has been conducted at Cuzco Amazonica, the bird list is very impressive. We have already found 102 species. This list will certainly expand greatly as the project continues.

I would like to thank you and your staff at the Ministry of Agriculture for your support in this study.

Sincerely,

Ned K. Johnson
Curator in Ornithology
Professor of Zoology

Birds Collected at Albergue, Madre de Dios, Peru, during November-December 1982 and May-June 1983
