

Inkaterra Reserva Amazonica

A private ecological reserve situated deep in the lush Amazon rainforest, [Inkaterra Reserva Amazonica](#) is all about low-impact elegance. Adjacent to the property is Tambopata National Reserve, one of the few easily-accessible virgin tropical rainforests in the world. With its 274,690-hectare area, the reserve is known for its mega biodiversity. As for the hotel group, Inkaterra has worked side by side with the Global Crop Diversity Trust and International Potato Center to open the Food Forever Experience which addresses the effects of climate change with strategies to enhance food security worldwide.
